

# Software Engineer - Linux C++

Company: borwell Ltd  
Position: Software Engineer  
Location: Malvern, Worcestershire  
Salary: £18-24k depending on experience

## About the business

borwell is an innovative technology company that provides high quality solutions to businesses and government departments. Projects are typically in the Manufacturing, Engineering, Surveying and Defence sectors in the UK.

The company has two streams of business, Application Development and IT Consultancy. They provide bespoke application development to all sizes of business, and provide Business Transformation consultancy in partnership with leading consultancy companies.

Recently they have won further work supporting the Royal Navy with a Ship Tracking application. The system operates 24/7 and provides critical input to decision makers within UK Forces, Home Office, Cabinet Office and Other Government Departments (OGDs).

Therefore, we require a sharp, problem-solving, enthusiastic Software Engineer to join the existing project team.

## The Opportunity

This is an excellent and interesting opportunity for a flexible and highly driven person. Ideally you will have some of the required experience although showing the ability to learn and a dynamic attitude will allow you to gain the necessary skills. You will play an important part in borwell's continuing expansion.

As a small company you will be involved in other areas of the business, giving you an excellent opportunity to learn new technologies and business skills from their experienced IT team.

This is a fantastic opportunity to learn, become involved and have input into an expanding company - where cutting-edge technology and interesting projects are delivered in a professional yet fun way.
